ROUND GUTTER SYSTEM**

Our round downspout and elbows are seamless and flared on one end for a perfect fit.

Our gutter profile is deeper. We use wider copper coil (girth) to fabricate our gutters. Our 5" gutter has as much copper and moves as much water as a standard 6" half round gutter. The chart below illustrates the difference.

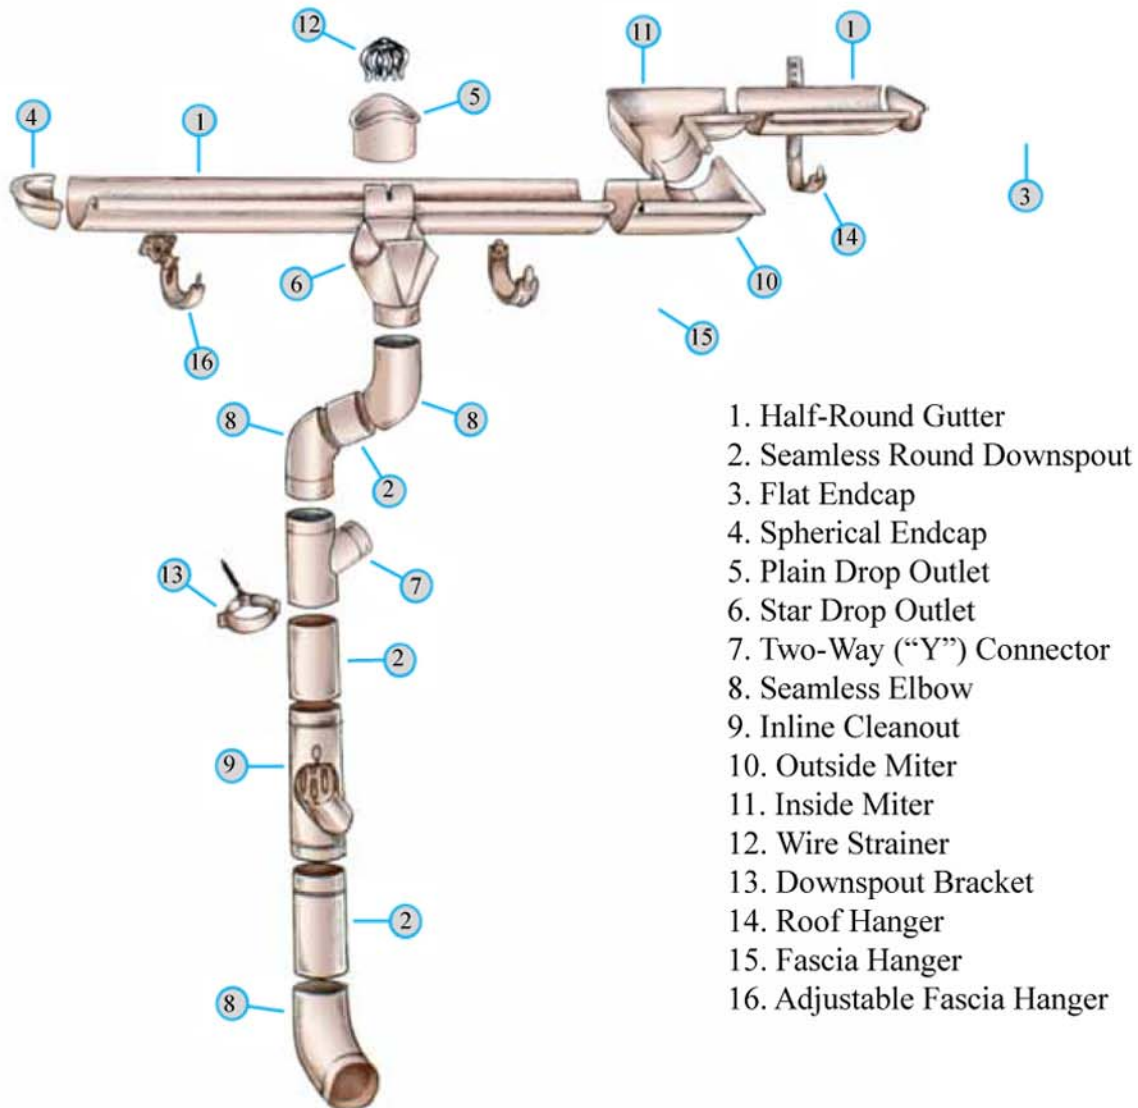

ES – EUROSTAR GUTTER SYSTEM	ES Girth	Competition
5" Half Round Copper Gutters	11 1/2"	10"
6" Half Round Copper Gutters	13 1/8"	11 1/2"
