

Fascia

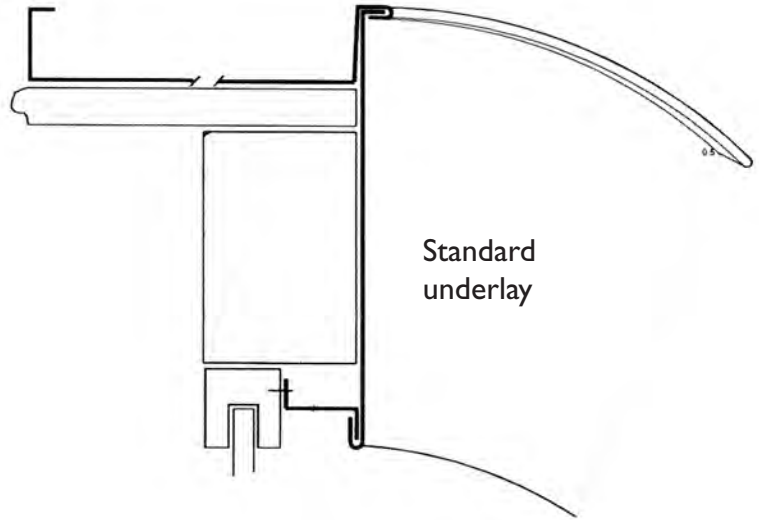

We offer rounded fascia for the front of dormers, barrel vaults and most fascia applications.

1. Fascia with a horizontal (male) leg allowing the metal roof panel to close fascia.
2. Fascia with a horizontal (male) leg and hem for seaming into the metal roof.

The fascia can be manufactured with a minimum face width of 2 ³/₄".

The minimum radius of the fascia is 2'

A ³/₄" drip edge is optional on both fascia.

We offer radius fascia in the following materials:

Aluminum (mill or Kynar finish)	.032
Steel (mill or Kynar)	24 gauge
Copper	16 ounce

All flashing is fabricated from 48" x 120" flat stock. Standard finished piece is 96".
