ROOFING *Accessories*

ACM is a "one stop shop" manufacturing system for your exterior metal products.

ACM manufactures rainware, edge metals, trim coil, soffit and fascia, and siding accessories. We are constantly upgrading our plants and machinery to improve quality, add additional profiles, and create new innovative products.

Homeowners want consistent color matches for their soffit and fascia, rainware, edge metals, trim coil, and siding accessories.

Some contractors buy gutter coil, soffit and fascia, edge metals, etc., from a wide variety of manufacturers and supply centers to get the lowest cost. The end result is that their components don't quite match and now it's permanently spoiled the appearance of the home.

Our **Color-Thru System™** has 24 colors to which you can match all parts of the house. You can use this system of colors to help you sell more jobs. The homeowner will see more value in your proposal if you can provide accurate color matches on all parts of the house.

Aluminum is made with majority of post consumer waste.

Aluminum and steel are recyclable, aluminum even more so. Did you know that Aluminum can be recycled over and over again? 75% of all aluminum ever smelted is still being recycled.

We keep Green Circle Certificates on hand for your access proving that 75% more of our raw material comes from recycled consumer waste. You may use this information to advertise that you are a "Green" company or as back-up documentation for government projects.
