

Bonderite[®] Edge Metals Specifications

MATERIALS

- A. Bonderite[®] 37S treatment converts the surface of the galvanized steel to a non-metallic, crystalline, zinc phosphate coating which inhibits corrosion and increases the adhesion and durability of applied paint finishes.

- B. ACM 26 gauge Bonderite[®] edge metal products are available:
 - 24 gauge 4 x 10 Flat Sheets
 - 26 gauge Select Drip Edges and Gravel Stops, Roof to Wall Flashing, 4x10 Flat Sheets, and Ribbed Tile Pan

APPLICATIONS

ACM Bonderite[®] edge metal products are designed for residential and light commercial applications. Edge metal products shall be attached per contractor's direction and local and state building codes.

CONSIDERATIONS

Corrosion is likely to happen with direct contact of Bonderite[®] products to certain dissimilar materials or water run-off from same such materials. Care should be taken to avoid contact of aluminum with any corrosive materials during the installation process, including, but not limited to: concrete, stucco, pretreated lumber, corrosive chemicals, fiber cement products, masonry cement, roofing made with metallic granules of dissimilar metals (aluminum, zinc, copper, etc.), salt, and dissimilar metals.

*Bonderite[®] products may be available in specific geographic distribution areas.
